## Summary

Computer Science undergraduate at VIT Vellore building secure software across backend, cybersecurity, machine learning, and blockchain.

## Education

### Vellore Institute of Technology

B.Tech in Computer Science specializing in Blockchain Technology

Vellore, Tamil Nadu  
2023 – 2027 | CGPA: 8.5

### Delhi Public School, Varanasi

Class XII (CBSE) 84.4% (2022) | Class X (CBSE) 93.2% (2020)

Varanasi, India

## Experience

### NowFloats (Reliance Industries)

May 2026 – August 2026 | Hyderabad, India

Backend & Information Security Intern

- Built and maintained REST APIs using .NET and Django; implemented input validation, parameterized queries, and rate limiting to harden endpoints against injection and abuse.
- Conducted threat modeling and performed static code analysis using SAST tooling; identified and remediated OWASP Top 10 vulnerabilities across internal services.

### Gurugram Police Cyber Security Summer Internship (GPCSSI 2026)

June 2026 | Gurugram, India

Cyber Security Intern

- Built an automated Bulk IP Translator, reducing IP address processing time by 99% and saving investigating officers 10+ hours weekly through high-volume processing.

### K12 Techno Services

May 2024 – July 2024 | Bengaluru, India

App Developer Intern

- Built production Flutter apps with Django REST APIs and PostgreSQL serving 1,000+ users; reduced API latency by 30% via query optimization, indexing, and caching.
- Engineered JWT authentication and RBAC authorization with WebSocket-based real-time sync, reducing refresh latency by 40%.

### The WhiteHats Club

VIT Vellore

### Founding Board & Vice Chairperson

Jan 2025 – Dec 2025

- Led a 100+ member cybersecurity community; organized CTFs, hackathons, and mentoring sessions.

### Secretary

Jan 2026 – Present

- Managed operations, budgets, and documentation for 10+ technical events.

## Projects

### CITADEL Secure Military Communication System (Hackathon Winner)

2026

Secure battlefield communication with AES-256 + ECC encryption, blockchain-based message validation, and ESP32 mesh nodes to prevent replay and tampering attacks.

### RePlate FMCG Supply Chain Optimization

2026

ML demand forecasting platform with Django + PostgreSQL backend reducing inventory mismatch by 22%.

### Nimbus Sportsman Profile & Social Application

2026

Flutter-based athlete networking app with Firebase auth, real-time feeds, and concurrent user interaction handling.

### Fruit Ripeness Detection System (Hackathon Winner)

2025

Edge-AI fruit quality classifier using YOLOv8 (92% mAP) deployed on Raspberry Pi with TensorFlow Lite.

## Achievements & Certifications

Yantra Central Hack Winner 2025 AI/ML Developer

Yantra Central Hack Winner 2026 Team Lead | Cybersecurity + Blockchain Developer

1st Position SELECT Makeathon Team Lead | RPi, Blockchain, Backend, Cybersecurity

2nd Position Equinox Hackathon Team Lead | Blockchain, Cybersecurity, RPi

LOR Flutter Certification - Angela Yu AI/ML Certification - Kirill Eremenko

## Technical Skills

**Languages & Frameworks:** Python, C++, JavaScript, Dart, SQL, Flutter, Django, React, Node.js, Solidity, .NET

**Technologies & Tools:** Distributed Systems, REST APIs, WebSockets, Blockchain, Machine Learning, SAST, OWASP, Git, Linux, MongoDB, PostgreSQL, Raspberry Pi, ESP32
